PROFESSIONAL PROFILE

MSc Advanced Computer Science graduate with Distinction and practical front-end experience from academic and personal projects. Built responsive web interfaces using HTML, CSS and JavaScript, including an interactive Three.js portfolio, a calculator and an academic payment application. Comfortable with Git, GitHub and Vite, and keen to contribute to a product team while continuing to grow as a developer.

TECHNICAL SKILLS

Front-end: HTML5, CSS3, JavaScript, React, responsive web design, mobile compatibility
Interactive web: Three.js, accessible interfaces, user input handling
Tools and deployment: Git, GitHub, Vite, GitHub Pages, Blender
Additional development: Python, Django, debugging, performance optimisation

SELECTED PROJECTS

SkillBridge - Bootcamp Group Project | Front-End Developer

Technologies: React, Vite, JavaScript, CSS, Git, GitHub, Render

- Contributed the responsive front-end for a community platform connecting software and business development learners.
- Connected profile, discovery and messaging interfaces to the backend using Fetch API and REST requests; my project partner developed the backend.

Interactive 3D Portfolio Website - MSc Final Project (76%)

Technologies: JavaScript, Three.js, HTML5, CSS3, Blender, Git, GitHub

- Developed and deployed a responsive 3D portfolio with animated navigation, object interactions and an integrated CV viewer on GitHub Pages.

Calculator Web App

Technologies: JavaScript, HTML5, CSS3

- Built an accessible calculator interface with interactive JavaScript input handling.

Online Payment Service - Academic Project

Technologies: Python, Django, HTML5, CSS3

- Developed user-facing Django pages in HTML and CSS and contributed to the application's structure and functionality.

EDUCATION

MSc Advanced Computer Science | University of Sussex, UK | 2025-2026
